Hawk Risk Solutions, as a leading provider of Risk & Asset Management services, offers an extensive range of risk mitigating solutions to our exclusive clientele, including corporate and industrial guarding requirements. We uphold stringent compliance standards to ensure that only the most qualified security officers are selected to join our team.

At Hawk Risk Solutions, we prioritize PSIRA requirements and seek security officers with credible references from previous employers. Our rigorous pre-vetting process guarantees that each candidate meets our high standards of professionalism and expertise. Additionally, we emphasize health and safety by requiring security officers to undergo training in firefighting and first aid qualifications as part of our recruitment standards. In cases where new candidates lack the necessary training but successfully pass our pre-vetting process, Hawk Risk Protection invests in the required training to ensure their skill development.

To maintain the highest level of integrity and security, all new security officers undergo fingerprint criminal clearance and a Voice Stress Analysis Test before joining our team. We go beyond simply identifying deception; our quarterly Voice Stress Analysis assessments also measure daily production, ensuring optimal performance and service delivery to our clients.
